

1

From prevention of occupational risks or logistics operations to mass transit security systems, intelligent computer vision offers a wide range of possibilities. **Pixelabs offers tracking solutions for your company.**

2

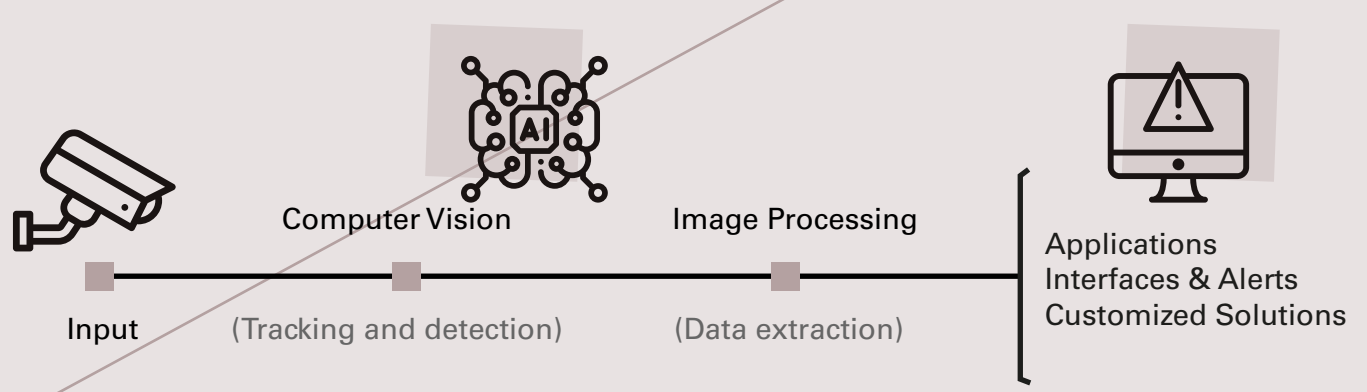

Nowadays security systems and video surveillance systems are complex. Usually, we can find analog video cameras or video IP systems depending on the scenario. Only the advanced installations incorporate Artificial Intelligence or computer vision.

3

Value Proposition

- Prevention of occupational risks.
- Intelligent video cameras.
- Support to security personnel.
- Advanced computer vision solutions.

4

Key factors:

- Improve operators' security habits
- Live tracking
- Personalized software
- Integration with existing solutions or services
